NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Sight seeing 20 minute flight from KS6S
circled city of Saint Paul and came
back to KS6S. over the numbers
of 34 at KS6S, Landing speed 78 knots
& pitch nose down ready to flare and
go into ground effect and bleed of speed.
All of a sudden at about 20 feet AGL
plane just went straight down and felt
we landed flat. Hit ground slight nose up.
~~When~~ When passengers got out I checked
the landing gear because I thought it
might have gotten damaged. No damage
to landing gear but tail & bottom section
of rudder damaged.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Landed with Full Flaps. Next Time maybe 50% Flaps and 85 knots landing speed? IF This was wind shear, maybe less Flaps more speed?
