Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Body of aircraft was substantially damaged, end of taile was separated, side rotor hit top of light pole. There were significant markings on tarmac where aircraft crashed.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I was visiting a friend at his ranch in Boerne TX (331 FM 474 Boerne TX 78006), Mr. Rony Lidor (323-683-1001) who has a private helipad and who is also a helicopter pilot for many years. I left his home around 16:00 local time heading to Kestrel Airpark (1T7) at the suggestion of my friend who knows the area, to pick up fuel before continuing to fly for my final destination to my secondary residence in Spicewood TX (303 Amngel Song Cove, Spicewood TX 78669, where I have a private helipad).

I arrived at Kestrel Airpark around 16:15 and landed on runway 12, since the prevailing winds were from the S/E. I estimated at the time the wind to be at 7-10 Kts based on the wind sock. There is no local automated weather advisory. I have fueled there previously and knew that the procedure to approach the self service fuel pump is from the south east of the runway. After parking next to the pump, i topped off the tanks and proceded to depart the self service fueling area heading north west as expected (please see pictures of the area attached). This is a very confined area with a big tree to the south west of the pump and on the other side (north east of the pump) there is a light pole. As I took the helicopter to a hover (around 16:35) and started to advance twoards the north west exit path, I realized I was having a significant left side quarterly winds and a hard time to control the tail. I did not feel I could maneuver the aricraft to bring my nose towards the wind in that confined area, I then reaized that if I wanted to avoid any obstacles I should lift the aricraft above the tree and the light pole from that same area. As the aircraft lifted up I felt a sudden gust that pushed over my tail to the right without being able to control it and hence the side rotor hit the top of the light pole. I heard a loud "bang" which caused me to immediately lower the collective and in a fraction of a second I found myself on the tarmac and the ehlicpter tipped to the left. I never lost consciousness. I found myself hanging on the seat belt and shoulder harness with my right shoulder blocked by the shoulder harness. I had to "swim" out of the shoulder harness to liberate my arm and then I was able to cut off the fuel and the electirc switches including the battery. Neighbors showed up very quickly and helped me to get out when I noted that I was bleeding from my scalp. It turned out that I had a 2 inch laceration on my right scalp side just above my hairline and needed four stiches at the ER where I was taken (Methodist Stone Oak Hospital in San Antonio). The examination as well as the CT sdcsn of the head where normal.

I sincerely believe that this self service fuel pump area is hazardous due to the narrowness of the path, particularly at time of potential windy conditions. I believe that the tree should be removed and the tarmac paved there before other helicopters should be allowed to approach the self serve fuel pump area.

I also believe that what saved me was the rubber bladder fuel tanks (for which a service bulletin was issued three or four years ago), which prevented from any fire to occur despite the violent nature of the crash with full fuel on board. I strongly recommend that an AD should be issued on the isntallatiopn of bladder tanks on all R44 currently operating.

Please see attached additional items: My Statement, copy of airman certificate, copy of medical certificate, copy of my most recent biennual examination, copy of most recent 100 hour inspection, pictures of the self service fuel pump area from two angles with additional infromation on the bird view picture.

RECOMMENDATION (How could this accident/incident have been prevented?)
