Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller blades are bent. Damage to both outer wings. Slightly bent wing struts. Right landing gear is bent. Slight buckling in the right wing. Vertical stabilizer slightly damaged at the top. Windshield is damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The flight departed 1U1 around 0830 Pacific time. Around 1000 mountain time, the flight was approaching 6S5 following another aircraft to runway 16. The weather was clear and calm winds. A normal approach and touchdown to runway 16 was made. During the roll out, the aircraft veered sharply to the left. The left wing contacted the runway and the aircraft continued in a sharp turn until it departed the runway into loose soil. At that point, the propeller contacted the ground and the airplane nosed over and came to a rest on it's back. All occupants exited the aircraft using the normal exits. The wreckage was next to and aligned with runway 16 displaced laterally about 15 feet from the edge of the pavement. The longitudinal axis of the airplane was aligned with the edge of the pavement. The nose of the airplane was pointing to the north (340 degrees). A long skid mark consistant with a locked tire was observed beginning about 200 feet from where the aircraft departed the runway and ending at the edge of the runway. The skid mark began near the middle of the runway.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The Pilot was not wearing shoes. The front seat passenger was wearing steel toe boots. It is possible that the front seat passenger inadvertently applied brake pressure without realizing he was adding so much pressure. In the future I would not allow passengers to wear such heavy foot wear in the front seat.
