NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On June 4, 2016, I prepared for takeoff in a C-172 on the south runway at Bluffs airport in Henderson, AR (75AR). After successfully completing the run-up checklist I added power and started the take-off roll. Once the aircraft became airborne I lowered the nose in order to stay in ground effect until reaching Vx speed. After reaching Vx, I initiated a climb and noticed the airplane starting to sink and lose airspeed. I once again lowered the nose in an attempt to regain airspeed. At this point the aircraft was very gradually gaining airspeed and runway was running out. It was apparent that we would be unable to clear the trees at the end of the runway so I pushed the nose of the aircraft toward the runway in attempt to land before the trees. When the airplane hit the ground the landing gear collapsed causing the prop to hit the ground. Everything was happening so quickly and the next thing I recall is coming to rest just short of the trees.
