Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

prop strike, airframe damage, aircraft flipped over.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I decided to go to Saline hot springs with my Girlfriend, and looked at a YouTube video on landing at the Chicken Strip Airstrip which serves as the springs airport. I approached the strip at 60 Knots airspeed in my Grumman Yankee, and touched down near the threshold of the strip. I applied brakes, and my left wing lifted a little due to gusting wind, so I backed off on the brakes, and let the aircraft bleed off speed, and left a little power on to taxi up the incline of the strip as recommended in the YouTube video. The strip ended, way before I expected, and I hit a mound of dirt at the end of the runway. As soon as I saw the mound of dirt I knew there was no way to add power and go around so I applied full breaking and hit the mound at about 15- 20 MPH which collapsed the nose gear, and made the plane flip. The temperature at the time was about 105 F. I consider this accident to be my fault, I should have gone there in cooler conditions with less wind. There were no injuries to myself or my girlfriend due to the low speed of the impact.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Don't go to short dirt airstrips in gusting wind conditions and high heat.
