NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

My trip began with a takeoff from a non-airport location near San Augustine, TX and I was headed to Nacogdoches KOCH. I knew the direction I should be flying and had flown for about 10 minutes. I reached to enter direct to with my left hand and lost cycle in the process. I usually fly with cycle in hand rested on top of my right leg. I am unsure if I had pushed down on my leg as I reached up or something else had caused me to lose the cycle. Matt had drilled multiple times to never let go of the cycle. When I lost it, I was so alarmed that I quickly reached, by accident, and managed to somehow shove it far to the left. The next thing I knew, my feet were above my head because my R44 had rolled to the left that far. Due to me watching the Robinson video, I knew what I had managed to do, I then shoved the cycle down and my R44 slowly rolled back over and I gained control. With the abrupt movement that had just taken place, I did not believe that that could have not damaged my props. I then slowly began to auto rotate down and I saw an opening to my left. I was in a position where I was able to clear the trees and had a good flare before my skids reached the ground. The entire time, I was praying that my props would stay together until I was able to land. It was a very soft landing, but the ground I had landed on was very soft and wet. My left skid landed 8 to 10 inches lower than my right skid. The ground in front of my left skid had too much of an incline for my left skid to slide. This caused the left skid to collapse backwards causing me to slowly roll forward on the nose of my R44. That was when all hell broke loose. I could not have been going very fast because where I had first touched ground was less than 10 feet from where the helicopter ended up at. I'm not sure how with all the chaos I heard, but I made it out without a scratch on me, thanks to the good Lord and my training.
