NOTAMs (D and FDC), AIRMETs, SIGMETs, PIREPs in effect at the time of the accident/incident:

DAY 1 REPORT OF AIRCRAFT AND OTHER PROPERTY DAMAGE					
Aircraft Damage ☐ None ☒ Substantial ☐ Minor ☐ Destroyed ☐ ☐ Unknown		Aircraft Fire ☒ None ☐ Both Ground and In-Flight ☐ In-Flight ☐ Fire at Unknown Time ☐ On-Ground ☐ Unknown		Aircraft Explosion ☒ None ☐ Both Ground and In-Flight ☐ In-Flight ☐ Explosion at Unknown Time ☐ On-Ground ☐ Unknown	
Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i>					
Nose gear bent backwards. All three wheel fairings (cowlings) cracked (fiber glass). Propeller, constant speed gearing, and engine damaged. Engine cowling (fiber glass) cracked and bent. Slight crack in left wing root (fiberglass). Significant damage to left end of wing including fuel tank on that wing. Vertical tail and rudder significantly damaged. Windscreen and both clam-shell canopy doors significantly damaged. All plexi-glass (windscreen and canopy doors) broken.					
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>					
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.					
Weather and notams checked – nothing significant for planned flight (no flight plan). Planned flight was for takeoff from Sunrise Beach Airport, sightsee along Lake LBJ (this was my wife's first flight with me in this airplane) heading west northwest to the Llano airport for some pattern work and then return to Sunrise Beach Airport. Passenger brief was accomplished, no discrepancies noted on walk around. Engine start and preflight checks accomplished. Took off from Sunrise Beach Airport at 8am. Leveled off about 2500' AGL and proceeded west along Llano River to Llano airport. Shot 3 touch and gos at Llano airport (Rwy 17, left pattern) and returned to Sunrise Beach. First pattern back at Sunrise Beach was a low approach to "scare" any deer off of the runway. Flew left pattern to Rwy 12 for full stop. Landing was good (~8:45am), but after slowing to about 50mph I noticed nose gear was skidding. At about 30mph the nose gear hit an ant hill (determined after extraction from the airplane) where the nose gear dug in and flipped the airplane. We skidded upside down for about another 30 feet before coming to a stop. We were both upside down and after unbuckling our seat belt/shoulder harnesses I exited the left side of the airplane with my wife following me. I returned to the airplane to turn off the master switches and FADEC switches. Afterwards, our volunteer fire department and SRB city employees treated my wife and I for bleeding scratches/cuts.					

Operator/Owner Safety Recommendation

After the airplane came to a stop both my wife and I were hanging upside down with our shoulder harness and seat belt holding us there. This was a four point harness with the standard release like you find in commercial airliners. My wife got her seat belt undone quickly. I am not fat, but do have the standard old man belly above my waist. I had a fair amount of difficulty getting to the release lever of my seat belt. I hung there for at least 2 minutes trying to get my seat belt undone. If there would have been a fire my wife and I would have been toast. In any future airplane that I own I will not have that type of seat belt release. In my opinion it is just unsafe when hanging upside down.
