Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

There was damage to the tie-down assembly which is attached to the rear fuselage of the aircraft. There was damage to the skin and associated bulkhead which the tie-down assembly is attached to.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The aircraft was towed to the ramp in front of the terminal for passenger loading and preflight by the flight crew. The PIC and SIC of the flight did not install the tail stand to the tie-down assembly (tail hook) before passengers were loaded onto the aircraft. The station agent on duty did not verify this as well and the 7 passengers were loaded for Flt #2208 (FOD-STL) with the tail stand missing.

As the passengers got into the aircraft the aircraft dipped back onto its tail where it was later found out that the tie-down assembly struck the ground. The passengers who were onboard were deplaned and the aircraft return to its normal position off of the ground. The PIC of the flight then contacted maintenance who did a visual check of the aircraft from pictures sent to them, with no major damage noted other than bent skin. The aircraft was released to for service and was grounded in STL upon further visual inspection and damage found to a bulkhead the tie-down assembly is attached to.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

PIC and SIC need to ensure checklist usage and visual/tactile confirmation that the tail stand has been installed before passengers are enplaned and deplaned. Station Agent must also verify this, however, the PIC maintains the ultimate responsibility for installation of the tail stand for these operations. Amendments are being considered for the company operations manuals with relation to tail stand operations.
