

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: CHOTEAU State: MT

ZIP: 59422 Country: USA

Latitude: 47.828052 Longitude: -112.169432

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 07/02/2016 Local Time: 0815
mm/dd/yyyy

Time Zone: MDT

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N42469

Manufacturer: CESSNA

Model: 182L

Serial Number: 18259029

Year of Manufacture: 1968

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: _____ lbs

Weight at Time of Accident/Incident: 2686.4 lbs

Number of Seats: 4 Flight Crew Seats: 2

Cabin Crew Seats: 0 Passenger Seats: 2

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

LEFT WING CRUMPLED, LEFT DOOR POPPED OFF, BROKEN SIDE WINDOWS - LEFT SIDE, RIPPED RIGHT SIDE REAR FUSELAGE, PUNCTURED FUEL BLADDERS - BOTH WINGS, COMPRESSED FRONT FUSELAGE COWLING, LEFT COWLING NEAR LEFT FRONT SEAT CRUMPLED AND PUSHED INTO LEFT FRONT COCKPIT AREA, FLOOR IN LEFT FRONT SEAT AREA RIPPED OPEN, BOTH FRONT SEATS OFF THE CHAIR RAILS

DEAD PINE TREE STUMP DISLODGED FROM THE GROUND DUE TO IMPACT ON THE RIGHT REAR FUSELAGE, LIKELY SOME DAMAGE TO A PINE TREE THAT WAS IMPACTED BY THE PLANE

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This flight originated out of Choteau, MT (KCII) where I picked up 2 passengers to fly into Schafer USFS (8U2). We departed at 0730 MDT on 07/02/2016. The plan was to drop the 2 passengers (Keith Smith and Randy Decker) and one backpack at Schafer USFS. Then I was to return to pick up one more passenger (Earl Southard) and 2 back packs. Earl is a good friend of mine and the other two are long-time friends of his. They had been planning for almost a year to do this back pack trip starting at Schafer USFS and then hiking out. This was to be an 8-day trip for them. This was strictly a recreational effort and it was agreed we would evenly split the cost of the trip between us all.

At approximately 0800 MDT, I attempted to land at the airstrip but was coming in too fast so I did a go-around in order to slow down which I did. I landed the plane, applied braking action and was unable to slow down sufficiently to stop the plane before overshooting the runway. The passengers immediately exited the plane. Before exiting, I turned off the master switch to avoid sparking a fire since there was fuel draining from both wings and then left the aircraft. I climbed up the embankment to the runway since I imagined there would be those at the campsite or the ranger station that would be coming to see if there were injuries. I signaled that we were okay and then I noticed that the grass, about 6 to 8 inches tall, was very wet from morning dew. My shoes were completely soaked from walking through it for just a short distance. This excessive moisture on the airstrip was not anticipated and made for very slippery conditions, as though landing on a long sheet of ice. In September of 2015, I had made a flight to this airstrip for the first time landing about mid-morning. At that time I encountered no difficulty landing and stopping the same aircraft. I had one passenger with me on that flight.

At the end of the airstrip is a berm of earth which forms a type of ramp from which the aircraft essentially launched off the end of the airstrip resulting in the aircraft being in a climbing angle of attack. The forward motion and the angle of attack allowed the aircraft to impact against the stand of pine trees on the under-side of the aircraft which cushioned the impact with a very favorable result since the 2 passengers did not experience any injury and I received only a couple of bruises on my left arm and a small cut on the left side of my face beneath the lower lip. No stitches were required. I am experiencing some minor back pain in the middle right side of my back and I'm receiving chiropractic treatment.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator/Owner Safety Recommendation**

I had spoken to several people who were familiar with the Schafer airport before I had first flown in there. My employer had flown in there many times without any difficulty and had encouraged me to make the flight after we discussed this at length. In all cases, nobody had ever mentioned the potential slippery conditions from dew-covered grass that would impede a landing. We were fortunate to fly out with the pilots of Montana Air Adventures from Kalispell, MT who had landed shortly after the incident. I was not aware of their existence until then. On the way out, one of the pilots had explained to me that he had been flying into Schafer for 23 years. He picked up immediately on the very slippery nature of the runway. From this conversation, it was made clear to me what was the cause of my inability to stop. I would have approached the landing far differently using short field and soft field landing techniques instead of what appeared to me to be normal landing conditions and what I considered to be a relatively normal approach to the landing. The sun was out. The air was pleasantly cool and density altitude conditions did not seem to be a factor.

I was also made aware that this is not an uncommon occurrence. I spoke to Arlin at Arlin's Air Service in Bozeman, MT who was contacted about retrieving the aircraft. They replaced the engine in my plane 2 years ago so I know him personally. He spoke of a couple of incidents that he had been previously been involved with for the same or similar reasons. Also, I spoke to another pilot working for Montana Air Adventures who had done just what I did a couple of years ago. This information would have been very beneficial to have more insight and perhaps a few hours instruction from this veteran pilot of flying into this location. I'm surprised that nobody from my area was aware of this company and more specifically, this pilot. He also explained that he had written a book about mountain flying and has instructed for the MT Department of Transportation about mountain flying. This is good information and it would have been very helpful to pursue this to increase awareness of unseen potential problems. A simple phone call to Montana Air Adventures in the flight planning could have increased awareness and better preparedness.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)**Was there Mechanical Malfunction/Failure?** ☐ Yes ☒ No*(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)***Total Time/Cycles
On Part**

_____ Hours

_____ Cycles

**Time Since This Part
Inspected/Overhauled**

FUEL & SERVICES INFORMATION**Fuel on Board at Last Takeoff***(Convert from pounds, as necessary)*52 Gallons**Fuel Type**☐ 80/87☐ 115/145☐ Jet B☐ Other, specify _____☒ 100 Low Lead☐ Jet A☐ JP8☐ 100/130☐ Jet A-1☐ Automotive**Other Services, if Any, Prior to Departure****EVACUATION OF AIRCRAFT****Was an emergency evacuation of the aircraft performed?** ☒ Yes ☐ No**Method of Exit** – Describe how the occupants exited and how many occupants evacuated each location

The left side door was popped off and the left seat was all the way forward so the rear left seat passenger immediately exited the aircraft as had been explained in the passenger briefing before taking off and ran to the rear of the plane. I was the last to leave the aircraft and frankly was not in a hurry to do so since nobody was injured and the impact did not seem as bad as it looks from the damage to the aircraft. The passenger in the right front seat did not immediately exit for the same reason. His side of the aircraft did not seem to be as

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for other aircraft)**Aircraft Registration Number**

Manufacturer: _____**Model:** _____**Damage to Other Aircraft**☐ Destroyed☐ Minor☐ Substantial☐ None**Registered Owner of Other Aircraft**

Name: _____

City: _____

State: _____ ZIP: _____

Country: _____

Pilot of Other Aircraft

Name: _____

City: _____

State: _____ ZIP: _____

Country: _____

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

In one of the segments above entitled Revenue Operation for FAR 121 (etc.), I mistakenly checked the "Domestic" button and was unable to un-check this selection. As previously stated, this was a recreational flight where we agreed to equally split the cost of the flight. No money was paid by any of the passengers and would-be passenger nor is any expected given the circumstances.

The passengers that flew in have continued with their backpacking trip having made modifications to their original plans. I believe they will be returning on July 10th. I have their phone numbers if needed.

WEIGHT & BALANCE CALCULATIONS

	Lbs		Arm		Moment
Empty Weight	1794.4	X	63.6	=	114173.72
Fuel Tanks (52 gals)	312.00	X	21.5	=	6708.00
Pilot	185.00	X	7.0	=	1295.00
Right Front Seat	185.00	X	7.5	=	1387.50
Rear Left Seat	185.00	X	11.0	=	2035.00
Rear Right Seat	60.00	X	11.0	=	660.00
Baggage	20.00	X	5.0	=	100.00

125907.72 (Moment) / 2720.40 (Lbs) = 46.28 CG is within limits
