Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose gear collapse. Causing damage to the nose gear, engine, prop, firewall, and all related components.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After departing KHDE for our flight to KFTG. I asked for a north deviation for a little weather, and a final altitude of 8,000. Both were granted. After clearing the weather was given direct KFTG. After being handed off several times by Denver we were given an Approach Frequency. Approach had us on a 230 (?) heading until intercepting the ILS for RWY 26 at I believe 7000. As we approached the airport somewhere around an 8 mile final, there was a second aircraft landing behind us, and they were told to turn left to 180 for victors to RWY 8. Tower said we would be the last ones to land on RWY 26. When airport was in sight I told tower, and we continued in for the visual for RWY 26. After landing the nose gear collapsed. We skidded to the right of the runway without hitting any other objects, and came to stop with about 1/2 of the plane on the grass, and the other 1/2 on the RWY. Both occupants safely exited the aircraft with no injuries. Emergency service personnel appeared on site shortly thereafter.
