Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Collapsed left main--Collapsed Nose gear, Wing tip strike, prop strike, cowling bent , spinner bent , left strut bent, Cabin frame from gear strike bent, rudder tip bent., bottom of fuselage near elevator bent . No property or runway damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Normal TPA landing approach, cleared threshold, when about a 100 to 150 ft down runway and about 10-12 feet above, lost lift and plane dropped to runway with a hard landing, left main gear partially collapsed, plane veered to the left side of runway, hit ditch and bent nose gear back, nosed into ditch and did a slow flip onto its back. Prop strike and nose damage to spinner and cowling. Approach speed over threshold 45 MPH.

Wind sock variable (doing 360) on approach--Forecast stated NNE with front coming in. Trees on left side of runway not an issue. Pond on right side of runway could have contributed to unstable air as it is slightly below elevation of runway and no significant foliage or trees in between, and is to the East of runway 32.

Departed at 12:00 noon and attempted landing at 12:45 PM Eastern all at 5B1. Local flight sight seeing for personal enjoyment. Plane not on runway; removed with a compact tractor and secured it in my hangar at 5B1 within 45 min. of accident

There were no injuries to pilot or passenger.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Come in at higher approach speed and flair further down runway .
