NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On a siteseeing flight with three passengers I departed KHYA as PIC around 1:00 PM Sunday 7/24/2016. We flew for nearly one hour around Cape Cod (Sandy Neck, Brewster, Monomoy) then returned along south coast of Cape Cod. I obtained HYA ATIS, winds calm out of north/ northwest, clear, no restrictions to visibility; VFR. temperature 85 degrees F. Can't recall dew point or altimeter today. Called HYA tower 15 miles out returning from SE. I was giving permission to land runway 33. On 1/2 mile final called tower and cleared for landing. Approach speed 80 knots over threshold and on normal descent. I approached runway 06/24 intersection and slowed descent to pass a slight rise in intersecting runway which has caused a bump in the past. Resumed descent and contacted surface with a bounce of about four feet, before plane resumed contact with runway I advanced full throttle to perform an aborted landing. Felt this was safest as next bounce would be greater with potential for propeller strike. The plane was now close to ground and I remember gaining very little altitude and approaching left side of runway. Kept power full and tried to regain altitude and direction but felt contact with grass surface. Next two seconds were a blur, despite attempt to regain airspeed and direction the plane was heading towards the airport perimeter and security fence. No ability to climb or brake. The plane collided with the security fence and came to a complete stop immediately. I smelled fuel and helped Hailey out of front seat and assisted two rear passengers out of plane. Turned off electrical and attempted to do same with fuel. Elected to leave plane quickly out of fear of fire. Met with passengers clear and on right side of plane awaiting first responders. All four of us were taken to Cape Cod Hospital and discharged within two hours. What little I recall of damage showed mostly front end of aircraft destroyed, left wing displace to rear, fixed gear destroyed and fuel leaking from left wing. Mostly concerned about the three passengers so I did not inspect the plane.

log books not returned as of today so I cannot give exact dates of medical and check ride last year, hours are approximate.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

In retrospect, I would have asked for runway 06, so as not to deal with the intersection small rise. In addition the plane would have had considerable space to lose airspeed and come to a halt left of runway six if the bounce had occurred on landing. I have successfully performed aborted landings in the past without difficulty but not with three passengers and a hot day. In retrospect I would have braked quickly after leaving the runway. I feel terrible and if given the opportunity to fly again will be extremely cautious and more sensitive to the risk of carrying passengers. This accident will forever be ingrained into my memory.
