NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Upn landing on a private grass runway which has a crown for drainage purposes, the glider drifted to the left. Right rudder was insufficient to stop the drift. Left wheel went over the slope of the drainage area and the left wing hit the corn. This spun the glider and it slid down drainage area toward the top of the drainage area into corn and then stopped. I'm guessing the rudder at the bottom of the tail may have touched the ground toward the top of the drainage area and cracked the fuselage leading to the tail. I noticed a divot in the ground and there was dirt on the rubber part of the tail. Everything happened so quickly and was a blur, but this is what I remember. No one was hurt.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

My last flight review was October 19, 2011 so I feel I was not a PIC pilot after October 13, 2013. I have always flown the motorglider with a CFI with a glider rating.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
