Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Copilot wing partially removed from fuselage. Nose landing gear bent. Prop strike. Tree bark partially torn from tree.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Saturday morning. I had promised my grandchildren an airplane ride. Clear day. Little wind. Middle of morning I took my grandson for a short 20 minute over his parents home 5 miles NW of my home and hangar at Sand Ridge. Time got away and it was noon. I asked my granddaughter if she still wanted to go for a ride. It was hot today. I knew this. I asked her if she still wanted to go for a ride. She said yes she still wanted to ride. The plan was to fly over her house like my grandson did with me. We got into the airplane. Seat belts on. She has flown with me many times in my 172 and once prior in the Ercoupe. We taxied to the N end of the runway and turned S to take off to the south. Mags checked. I slowly pushed the throttle forward and we were rolling. Gaining speed I tried to coax the aircraft into the air by putting slight pressure on the yoke. The nose came up a little, then the left wing rose up. I looked over and the right wing was quite low. Next thing I knew we were going SW at about a 45 degree across the runway. Heading for a tree. I managed to pull the throttle back. I tried to apply brakes and turn left. We impacted the tree with the right wing at about 3 feet from the fuselage. Here the aircraft spun in a clockwise direction about 90 degrees and came to rest. No one was ever unconscious here. I immediately told my granddaughter to get out quickly. She unbuckled her belt and jumped out and ran 30 yards away. I got out quickly also. This experience was quite like being in a bumper car at the county fair and getting hit. We were just sitting there looking at each other. My granddaughter told me several hours later that she probably brushed the yoke. I cannot express my feelings of good fortune of this potentially catastrophic event.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I have become quite aware of density altitude. DA along with a low powered aircraft do not make for a good departure condition.
