Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Landed in the tidal creek, aircraft destroyed and flooded

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

During solo flight I was training landings, takeoffs and flying in the pattern. While ~~the~~ approaching runway 31 in final stage, right before "flare" I noticed a deer on the runway where I planned to touch down. In order to avoid deer I slightly banked to the right and realized that I have to do go-around. I applied right rotor, full power, carb heat off and started retracting flaps. I was unable to gain enough power and started to lose altitude after passing trees and scraping one with my gear. In order to avoid collision with the trees in front of me I turned left to fly along the creek. I was descending and crashed in to the creek.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

in my opinion this accident could not be prevented.
I was too low and in final stage of slow flight, with 30°
flaps. Losing 150 is not strong enough to recover from
incident like that.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)
