Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Substantial damage to left wingtip, right wingtip and tail. The engine was separated from the aircraft causing substantial damage to the engine and propeller. Damage to corn was incurred to the area of impact.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed KOVL at approximately 0730 under part 137 to spray my last load on a remaining part of a field that was started the evening before. After finishing that load I was to return to KOVL for another load I ~~star~~ finished my main passes where I then continued to make end passes on the east side of the field flying north and south. After making two end passes, I came around for my third and final clean up pass for the load. Halfway through my swath I observed a glitch in my Satloc. I glanced down to look at my screen to see what the problem was. As I was glancing at my screen I felt & heard corn tassels hitting my wheels & boom. I quickly looked up & observed a slight rise in terrain. I saw I was sinking into the corn & immediately increased throttle & pulled back on my stick. I was unable to get out of the corn & was pulled into the corn further. The airplane then yawed to the right. The engine & left wingtip impacted the ground. The airplane then flipped upside down where it came to a stop. The engine separated from the airframe & was located about 30 feet from the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Maintaining focus outside of the cockpit while at a low level.
Problems with the Satloc could have been handled after pulling
out of the field & troubleshooting at a safe altitude.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
