Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller strike; Front landing gear broken off; Severe under carriage damage at front; Bent airframe. No damage to any other property.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was conducting full-stop landings and taxi back take offs at E25 using runway 23 right traffic. After take off, I stayed in the pattern for another landing with all conditions normal. On final approach my airspeed at 70mph, 20 degrees flaps I noticed a slight wind out of the south. Everything looked fine for a normal landing. I'm not sure why, but I believe I flared early and bounced the landing quite hard then I bounced again. I realized I had set myself up for porpoising down the runway and decided to abort the landing, I added power and the aircraft began to stabilize but that is when I retracted the flaps and I believe I did that much too soon. The airplane then sunk and hit the runway very hard. I was unable to control the plane after that, it swung hard to the right and left the runway and quickly came to a stop nose down in the dirt.

My departure time was approximately 07:30 and the accident occurred at approximately 08:00. My plans were to practice some landings at E25, my base airport, then do some local sightseeing and return to E25.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I believe the cause of the accident to be my retracting the flaps too soon after adding full power. I should have waited longer for the aircraft to further stabilize, gain speed and begin climbing. A contributing factor was my flaring too soon in the first place, causing the aircraft to porpoise. I will certainly get professional flight instruction concentrating on many landings before I again fly as PIC.
