

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Outlook State: Wa

ZIP: 98938 Country: USA

Latitude: N46:19:16 Longitude: W120:06:22

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 07/29/2016 Local Time: 07:05
mm/dd/yyyy

Time Zone: Pacific Daylight

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N1087N

Manufacturer: Bell Helicopter

Model: B206B3

Serial Number: 3019

Year of Manufacture: 1980

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

- ☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 3200 lbs

Weight at Time of Accident/Incident: 2522 lbs

Number of Seats: 1 Flight Crew Seats: 1

Cabin Crew Seats: 0 Passenger Seats: 0

Number of Engines: 1

Category of Aircraft

- ☐ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☒ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

- ☐ Normal
☐ Aerobatic
☐ Balloon
☐ Commuter
☐ Transport
☐ Utility

Special

- ☒ Restricted
☐ Limited
☐ Provisional
☐ Special Flight
☐ Experimental
☐ Special Light-Sport
☐ Experimental Light-Sport

- ☐ Certificate of Authorization or Waiver (COA)
☐ None ☐ Unknown

Landing Gear

(Check all that apply)

☐ Retractable

- ☐ Tricycle ☐ Tailwheel
☐ Amphibian ☒ High Skid
☐ Emergency Float ☐ Skid
☐ Float ☐ Ski
☐ Hull ☐ Ski/Wheel
☐ Other Launch/Recovery System
☐ None ☐ Unknown

Engine Type (Select one)

- ☐ Reciprocating ☐ Liquid Rocket
☒ Turbo Shaft ☐ Solid Rocket
☐ Turbo Prop ☐ Hybrid Rocket
☐ Turbo Jet ☐ None
☐ Turbo Fan ☐ Unknown
☐ Electric

Fuel System Type (Reciprocating)

- ☐ Carburetor ☐ Fuel-Injected

Engine	Engine Manufacturer	Engine Model/Series	Manufacturer's Serial Number	Date of Mfg. mm/dd/yyyy	Rated Power ☐ Horsepower or ☐ lbs of Thrust	Total Time (hours)	Time Since: Inspection (hours)	Overhaul (hours)

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft impacted ground nose low and on right side. Post crash fire consumed wreckage. Small <1 acre fire consumed brush in surrounding area.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Friday, July 29th 2016 I departed our Buena hangar a little after 5am and landed at our loading spot near Outlook, WA at about 5:20am to spray an orchard. I landed on a flat spot in the grass on the north border of the orchard which was next to the orchard I was going to spray. The flat spot was on top of a grass hill that sloped to downhill to the north. The hill also sloped to the east and to the west of our loading spot with a ravine on each side. The wind was mostly out of the west at about 3-4 mph and about 70 deg F. Kevin Lydin was already there with his pickup truck carrying a fuel tank and a trailer carrying the chemical and water. He was facing east on the orchard road so the hoses would be facing the helicopter. He stayed on the road in order to not get his truck stuck on the dirt hill. Because he was on the left side of my helicopter we had to lay the hoses out behind my skids so he could fill my spray tank on the right side. I only have a fill port for the chemical tank on the right side. I started spraying at 5:45am and took about 8 loads to spray the 59ac orchard. I was taking 75 gallons of water and keeping the chemical at 11 gallons. I kept my fuel between 15 and 25 gallons. I was taking off to the west and veered north downhill over the ravine before gaining speed and turning towards the orchard each time. I'd come back and landed with the back of my skids just in front of the hoses and Kevin would walk around my nose of the helicopter to fill me up for the next load. After the last load I had Kevin give me some water for a rinse load and he fueled me up to 30 gallons so I could fly to my next job. While he was doing this I grabbed my tote of spare items and my tool box from the back of his pickup and put them in my cargo compartment. At this time while fueling me he accidentally loaded my water tank full of water which is about 110gallons. I would have been over loaded so I sprayed my water on the ground until empty before taking off. Then I took off to head to the next job which was another orchard that was a little north of Granger, WA. I had about 2 gallons of chemical left and 30 gallons of fuel. It was 7am. As I took off the helicopter felt like the skids were dragging through the dirt even though I knew I was at least 5' above the ground. It felt like driving a pickup truck with the parking brake on. Then I realized the water hose must be still attached to the spray tank. I was later told it was actually hooked onto my skid. The second I realized I was still attached I tried to abort take off and hopefully backup and land. Right as I initiated this my helicopter dived forward and rolled right. I impacted the ground nose 1st rolling right. I don't know if my front right skid or if my main rotor hit the ground 1st. I must've closed my eyes during impact because when the helicopter came to a stop, I opened my eyes and I was lying on my right side still strapped into my seat and holding my controls. I reached forward and flipped the fuel shut off valve to off. I then counted to 10 while trying to hear if the main rotor, or parts of it, was still spinning. I then climbed out of the broken front windshield right as Kevin came running up to help me. He made sure I was ok. I then turned around to grab my stuff from the helicopter but I saw a grass fire had started by the engine compartment and tail boom attachment points. I yelled for Kevin to get some water from the trailer but he informed me that we were out. So I told him to grab his phone and we ran into the orchard for cover in case the fire caused an explosion. Kevin was trying to call 911 on his phone and after a minute or 2 I walked back to the end of the orchard row to look at the wreck. The fire hadn't grown much yet so I decided to pop the hoses off of the trailer, throw them on the ground and got into the pickup truck to drive away. Kevin got into the passenger seat with 911 on speaker phone. I drove east along the orchard road to the end of the orchard and then follow the small orchard road uphill to the south along the orchard border. We were hoping to find someone who could get some water for the fire before it got out of hand. Halfway up the hill my back started really hurting so I had Kevin drive and I laid back in the passenger seat. From there Kevin drove south to the top of the hill and then follow the road west again along the south border of the orchard. We still had 911 on speaker phone. We were informed that a deputy had arrived at the crash site so we stopped at an apple bin loading zone which was directly above the crash to the south on the opposite side of the orchard. I laid down on the flat ground and waited until the EMT's showed up to take me to Sunnyside Community Hospital.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The following policies have been implemented.

1. Hoses are not allowed to be laid around, or in other than a direct fashion to the helicopter. After loading, all hoses must be walked outside the boom area.
2. The loaders are to be equipped with 2 way communications to supplement hand signals. A radio call would have broken the error chain as the pilot was not looking in the direction of the loader at takeoff.
3. Loaders will not roll hoses or secure area while the operating helicopter is still on the loading spot.
4. Breakaways will be installed at the vehicle end, as a supplement to the breakaway at the aircraft. In this case, the hose failed at its weakest point which was at the vehicle.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
