Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Slight rippling on top of left wing after striking building door.
Metal building door dented.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed Renton airport (RNT) approx. 8:45pm, much later than expected.

Destination was Paine airport (PAE), home base for the plane.

Enroute ATIS reported that expected runway 34R was closed. PAE control tower closed. Switched to runway 34L.
Activated runway lights on 34L. Upon landing was difficult to see taxiways during roll-out due to runway light intensity.

Exited runway 34L, reported on CTAF to landing plane behind me that I was clear of the runway. Exited A-3 or A-4.
Proceeded to taxi South toward parking.

Missed turn off for parking area and ended up in WEST RAMP non-movement area.
While taxing North, back toward taxiway-A and toward the parking area (I could see the tower and new my parking was North), I made a left turn and clipped the NE corner of Building #38. Metal door on building dented.

While examining plane with flashlight, wife called on cell-phone (her phone log says 9:24pm). Told her I was delayed.

Taxied back South, regained taxiway-A, communicated on CTAF with about-to-depart aircraft and asked for taxi-way assistance. They provided detailed taxi-way instruction back to the tie-down parking area by Regal Air and the fuel depot. Tied-down successfully.

Contributing factors (I would say, are):

night landing,
bright runway lights,
airport diagram 09295 difficult to navigate with,
pilot not as familiar with 34L taxiways as with 34 right,
tower closed,
pilot's determination to proceed in poor visibility conditions (get-there-itis?),
pilot's failure to maintain adequate clearance while taxing in non-movement area between hangers.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Improved airport diagram, airport marking, airport light.
