Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Bulkhead in tail section damaged by tailstrike
Engine Frame bent by hard nose wheel impact

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I tried to perform a Short Field Landing. I used the second stripe as my aiming point. When pulled the power to idle and flared it was a little bit too high so i tried to push the nose down. The nose wheel hit first, and the aircraft bounced a couple of times and went away from runway centerline, damaging a taxiway light by taxiway A6. I used heavy brakes and got off of the runway and taxied back to the ramp.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Student should have gone around when she recognized that the flare was too high, as per Hillsboro Aero Academy's Stabilized Approach SOP, and if not, at least on the first bounce as per Hillsboro Aero Academy's "Bounce-and-go" Policy. Student has been taken off of solo status, and solo endorsements revoked.
