NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

In that day , I planned to fly from Miami Executive Airport (KTMB) to Marco Island (KMKY) and Naples Municipal Airport (KAPF) ,and after to return to KTMB.

I flew from KTMB to KMKY with VFR flight following and I made one touch-and-go at KMKY. Then, I continued to fly towards KAPF. I made a full stop at KAPF and had a rest approximately 45 min over there. I took off from KAPF to fly towards KTMB with VFR flight following.

Around 2:15 pm, I told flight following that I was going to listen to ATIS (after ATIS, Miami approach said to contact KTMB). Tower instructed me to fly straight in 9L. Approximately 5 miles from KTMB, winds were 150/8 kts , I was cleared to land 9L. Once on the approach, I continued my checklist with the landing checklist. For landing, it was my decision to apply 2 notches of flaps with the necessary crosswind correction, lining up with the center line. Upon touchdown, I lost control of the aircraft causing the plane to touch and balloon upward. In that process, I ballooned once more before coming to complete stop; went straight towards the ground.

After impacting the ground, I immediately shut off the master switch, ignition switch and fuel shut off valve and evacuated the aircraft. Approximately 15 minutes after impact, ramp 60 came to assess the aircraft and any injuries I may have sustained. No injuries acquired upon impact.
