Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Slight bends in both front and back spars on right wing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed an off airport landing site 20nm south east Circle Hot Springs at approximately 3:45 PM local time and was enroute to AK28 in Fairbanks. The terrain was rolling hills. As I progressed up Birch Creek I could see the pass through the hills to the Chena River was obscured so I elected to land at a close by off-airport site to wait and see if the weather would improve. I landed on the site and was taxiing to turn around when I dropped into an unseen wash out (ditch), which cause my right wing to suddenly drop and hit the ground which resulted in the bending of the wing spars.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

In retrospect, there 2 primary options I could have used to avoid this accident.

1) I could have returned to a maintained airport such as Circle Hot Springs or Central.

2) Since this was an off airport landing site and I had not landed there recently, after landing I should have shut down and walked through the area to confirm it was usable, before proceeding to taxi.
