Request for flight information from Jack Vanover @ NTSB

Jack

I departed the Boonville MO airport (KVER) at approximately 10:30 am CDT on Sunday August 14 th. 2016. I contacted Mizzou Approach shortly after takeoff and requested VFR flight following to the Fulton MO airport (KFTT). I was given a transponder code and told to maintain VFR. My flight level was maintained at 3,500' MSL. I was monitoring KCOU ATIS for wind and altimeter information. I had several radio transmissions with ATC. The last being that I had the destination airport in sight. After that I changed the transponder to VFR and began my descent to transition the Fulton airport from West to East at 2,200' MSL or 500' above the pattern. After crossing the airport and observing the wind sock, I set up for a left downwind approach to Runway 18. I did the rest of the pattern and lined up for final as normal. I checked the sock and it was less than 5 knots and less than 20 degrees off the center of the runway. I was checking my sight picture from the front and sides but somehow managed to not have the nose high enough and got a bad bounce unlike any I had previously experienced in my 412 hours of flying as PIC (77 of those in this aircraft N-78242.) On the third bounce the front gear gave way and the prop hit the runway. I immediately shut off the fuel and master when I stopped on the runway. A man and his wife were in the area of the terminal and saw that I was in trouble and came down in their car to assist me. I have his name and phone number if you need a witness. He is a retired Airforce Accident Investigator and said he would do so if requested. His wife called the police. I estimate the time the accident occurred be 10:55 CDT.

Respectfully submitted.

Kenneth W. Brokamp - [REDACTED]

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I have very little to say here other than the 3 bounces were so severe and so close together that I could not react fast enough to prevent the outcome. I have been told that I should have pushed the throttle to the fire wall and raised the nose. I have not experienced anything like this in my entire flying history. I plan to get with my flight instructor in his C-172 and spend some time learning how to cope with this situation should it occur in the future.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Engine removed at 1748 hours for overhaul.

Plane was removed for salvage by owner's insurance company in early September, therefore I am not able to get any more information on ELT.

I was alone in the plane at the time of the accident.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
