Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The helicopter is still being evaluated but damage is similar to a lightening strike .

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On 9 September, 2016, Aircraft N500TN was involved in a flash over event, 8 miles north east of Kennett, Missouri.

The aircraft was pre-flighted as per the rotorcraft flight manual. No discrepancies were found. The task for the day was to install rods on an energized powerline .These procedures were discussed during the Job Hazard Assessment. Communication between the pilot and the lineman was in good working order. The weather was forecasted to be 26-30C, clear skies and winds from NNW at 6-8kts.

Around 1250hrs about 10 rods had already been wrapped in separate locations. The aircraft had about 200lbs/ 30 Gallons of fuel on board. The last rod was installed and the ends were being snapped down when the flash over occurred. The aircraft was immediately maneuvered away from the line,under full power with no adverse control effect , landed and shut down .

The crew exited the aircraft and were uninjured . The aircraft was secured at the LZ pending further examination .
