Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft skin and frame damaged beyond repair. Main rotorblades are destroyed.

Small gouges on asphalt of helipad.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

While performing hover practice operations on the helipad at Cedar City Regional Airport with a new student working towards his private pilots certificate, the right skid of the helicopter contacted the ground and tipped over.

The student took controls to attempt to hover and began a nose down and right lateral movement. I immediately took controls and attempted to correct the downward right trend, at which point the right skid contacted the helipad and initiated a right rolling movement causing the rotor blades to contact the ground and the helicopter proceeded to roll onto its right side. The student and I immediately vacated the aircraft.
