Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to the left wing and left elevator primarily skin damage resulting from impacting the ditch.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 09/10/2016 at approximately 1:00 PM I was the flight instructor for Wayne Reid in a Cessna C-170B N8335A. As Wayne touched down on the grass strip just south of taxiway Bravo the aircraft bounced and as it touched down I took the controls. The aircraft had evidently drifted closer to the ditch than any of us thought and soon our left wing was lower as we rolled out. Not wanting to go further into the ditch I applied rudder inputs to ease us out of the ditch and put us back upon level ground. As we were getting out of the ditch the side loads on the left 29 inch tundra tire caused it to collapse which allowed our wing and tail to contact the ground. This yawed the aircraft which I quickly corrected. Please Note: This was not a ground loop, the aircraft was kept very straight and rolled to a stop upright with no injuries on the flat part of the runway where we intended to be. We then taxied the aircraft to the hanger and inspected the damage.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The grass airstrip can simply be located away from the ditch, which would have prevented this occurrence.
