Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Both wings partially separated from the fuselage and significant damage at the front from hitting the small pine trees; nose dented, cowling dented, trim wheel broken

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flight uneventful until preparing to land at 5W5 from KSVH. I crossed midfield, entered the pattern, flew the centerline to view the runway. Executed a go-around and setup for landing. Set full flaps, 75 knots, headed for centerline, touchdown point was good but it was getting dark and difficult to see. Upon landing, the runway was worse than expected, heavy vegetation pulling me left. pulled power, dropped flaps, and the left wheel entered the left apron in tall grass pulling the aircraft left harder. As I was slowing down, I pushed hard on the right rudder but the left wing hit a small sapling pine which swung the aircraft around to the left and stopped at the tree line in some small pines.

My wife and I were unhurt, exited the aircraft safely.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

It was really getting dark without runway lights. Should have diverted to another runway with runway lights.
