Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

2 of the three landing gears came off. Rotor hit the ground. Mast damaged. Tail damaged and body damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The accident occurred on Sept. 17, 2016 at around 11:45 am on runway 25 at Blairstown Airport (1N7). I had gone to the airport that morning to practice take-offs and landings in the pattern. Below is a brief description of the events leading up to the accident.

As I was positioned on the runway to take-off, I engaged the breaks. I brought the stick vertical and then gradually engaged the pre-rotator and brought the rotor rpm to 180. At which point I disengaged the pre-rotator, released the break and went full throttle. This is where I made the mistake. At this point I should have brought the stick all the way back but I did not. As a result the aircraft accelerated but the rotor rpm started to decrease as the stick was not back. The aircraft picked up speed and then I started to bring the stick back. At this point the aircraft was moving fast but the rotor had slowed down. As a result there was a lot of lift differential between the advancing and retreating blades sending the aircraft into blade flap. The stick then became uncontrollable and the aircraft then started to go off the runway into the grass to the left. I cut power to idle. The left landing gear and the front landing gear came off. The rotor hit the tail and the ground. The aircraft came to stop in the grass.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This was my mistake and I should have practiced the take-off in my mind before executing it. Having an acronym for the take-off process will help remember all the steps.
