NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On September 17, 2016 at approximately 11:20am, I had just finished the Biplane Silver Race at the Reno Air Races. I was landing on 08 at KRTS, Reno Stead Airport. It was a well-executed landing until, unbeknownst to me, my tailwheel got stuck in an expansion joint that runs down the centerline of the runway. There are several of these expansion joints along 08-26.

Once the tailwheel came loose from the joint, my aircraft swung wildly to the left and touched the right wing along the runway, as you can see in the below picture. By this time, I was already veering off the runway.

The aircraft came to rest as you see below, having swung around over 180 degrees. These pictures were taken from the catwalk of the Reno Stead Tower.

I immediately egressed the aircraft and pulled it off the side of the runway and awaited assistance.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The Expansion Joints on 08/26 at KRTS need to be corrected. The tar type substance they are currently using becomes too soft during warmer days and create havoc on small tailwheels.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
