Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

collapsed nose gear causing prop strike and break, engine mount damage, lower cowl damage, and spar box damage. Engine removed for inspection and repair if needed - No damage to airport property.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I left KSYI, Shelbyville Tn, with a full tank of gas at about 10.00 a.m. central time, August 24. 2016 on a VFR GPS direct flight to KSGJ, St Augustine Florida. The flight was uneventful I was on almost a straight in flight to KSGJ runway 13. At about 10 miles out, I contacted the KSGJ tower and requested a wind advisory. I was told by the tower that wind was 07 at 12. I was approved for a straight in approach on runway 13. As I neared the field I experienced more than the usual amount of terrain and convection turbulence probably combined with some gusts that bounced my ELSA Arion Lightening around. Nevertheless I established a stable approach to runway 13 over the center line and proceeded with the landing. I was utilizing half flaps and had my speed between 55 and 60 Knots as I approached touchdown. At about 5ft above the runway I was hit with a gust that I estimate was at 20 or more knots. This caused to be balloon up and bounced down nose wheel first. Seeing and feeling the nose wheel and prop strike, I used differential braking of the mains and I was able to bring the airplane to a stop just at the edge of the runway. There was no damage to the runway. There was no debris from incident beyond the shattered prop. One of the Maintenance facilities came out with a pickup truck - the nose of N481SL was lifted and place on tail gate of pickup and strapped to it - pickup then towed the plane to it's hanger where it was parked until after inspections before being shipped back to factory for repairs.
