NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

ON 9/16/2016 I departed the Ft. Lauderdale Executive airport in a newly purchased Great Lakes 2T-1A-2 biplane. I flew VFR to the Treasure Coast Airpark (FL37), a private fly-in community, approximately 100 nm away. The weather was good VFR conditions. The airpark has a single grass runway 9-27. I was the only person on-board.

There is no weather reporting at FL37 so I obtained the latest ATIS information from the Stuart Airport (KSUA) which indicated the winds were from 110 degrees.

The Great Lakes is a tandem seat 2 place biplane with conventional (tailwheel) landing gear. The aircraft has to be flown from the rear seat when solo. The forward visibility is very limited especially in the landing configuration.

I entered on a left downwind to runway 9 and completed the before landing checklist. I turned onto the base leg and slowed the aircraft to the recommended approach speed of 70 to 75 MPH. I could see clearly what I took as the runway. There were hangers on both sides and a wind sock on one of the hangers. The grass appeared smooth and recently cut and no obstructions. There was a paved roadway running parallel to the grass runway with an X on both ends. I took this to mean that I was to land on the grass and not the paved roadway.

I turned onto final approach, the forward view was very limited and I could no longer see the runway, so I put the aircraft into a "slip" so that I could see ahead. At about 50 feet I canceled the slip and started to flair. The aircraft settled smoothly onto the runway. With the aircraft on the ground and the tailwheel on the ground, you cannot see ahead and must use side vision to steer the aircraft. As the aircraft slowed to about 20 MPH, I felt the airplane hit something. The left main landing gear collapsed and the prop hit the ground. Both lower wing tips were damaged. There were no injuries.

After I exited the aircraft, to my horror, I discovered that I had landed on a taxiway and the aircraft had hit a drainage pipe that was hidden by the grass.
