Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The aircraft damage was extensive. floats were bent. aircraft submerged and inverted held on the surface by the floats. Prop bent, tail section bent, windshield destroyed

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Normal approach for lake landing on floats to the north. Wheels retracted as evidenced by the lights on the cockpit and visual inspection. Appeared to be landing into the wind. Previous reports indicated light and variable winds. Immediately upon touching the water, the plane inverted in the water. The pilot and passenger emerged from the cockpit and climbed onto the floats. Both had only minor scratches and bruises. Within five minutes a private boat arrived and took the pilot and passenger to shore.

While waiting for the boat to arrive, the pilot noticed the winds were 5-7 MPH from the south. This misreading of the wind direction contributed to the accident.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Better read of the wind direction by the pilot.
