Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Helicopter rolled onto right hand side. Main rotor blades destroyed, main rotor transmission heavily damaged, tail rotor assembly vertical stab was sheared off of tailboom and is resting in front of nose of cabin. Right hand skid tube broken.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I was flying to the bluffs north east of camp (approx 16:55) to pick up a crew of 4 people. The weather was deteriorating. I flew into the area with flat light conditions and snow covered ground. I established the helicopter over the plateau in a slow speed condition and stayed low to the ground. Part way to the destination the visibility decreased and I slowed down. My snowball caught up to the helicopter and reduced the visibility to whiteout conditions with no reference. The helicopter contacted the ground in a right hand slide, and rolled onto the pilots side of aircraft.
