Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose wheel buckled, main gear bent, nose of craft and Pilot side wing damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I had flown from KREI to KHMT for my Biannual Flight Review. I had completed it and was heading back to KREI. The time was about 11:00AM

Upon take off the canopy opened. I attempted to land from about 80 ft and the canopy began bobbing up and down. I lost perspective because of the motion or the plane moved because of the motion and I landed hard on the nose wheel. It buckled and the plane went down onto the nose. I then slid to a stop on the runway. I climbed from the wreckage upon coming to a stop.

First responder fire personnel were there in about one minute and had me strapped to a backboard. I did not get to look closely at the wreckage.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I am unsure if the canopy was unlatched or came unlatched. Recommendation would be to triple check that it is latched. If it came unlatched than I don't have a recommendation.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
