air temp 52deg
winds 10kts 220
skies scattered at 2800feet
10sm
15 gallons of fuel

My passenger, my cousin Brock and I departed to the south of the field, we had flown approximately 45 minutes before I choose to return us to KBMT. We approached on RWY 13 and slowed to a stop on the runway near ramp C. At that time we deiced to hover taxi over to the Military Tank before we land for the day. When we had made it clear of the taxiway we experienced a small gust of wind as the wind was now a tail wind. I corrected the left rotation action by the gust with right peddle. I took note of our airspeed and we were at 20Kts our current altitude was approximately 10 feet. In only a second later we experienced a second gust of wind much greater than the first. I applied right peddle but we kept in the rotation, so I nudged the cyclic to the right to follow the left spin out and regain control. I kept note of our altitude and made adjustments as necessary to keep us air born. In a brief second I had gotten our forward movement to stop but at that time our left skid had made ground impact which caused the aircraft to roll to the left. After impact I turned off the fuel, master, and the plasma/magnetos. I checked on Brock and made sure he was ok then I exited the aircraft and asked him if he could move. He was ok and said to go get help.

Joey Arena and his father were already there to assist us.

time of the crash approx. 10:00am
air temp 56 degrees
winds 14kts gst24 220deg
sky scat 030
approx. 9 gallons of fuel
