NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was coming in for a landing on Runway 8 at FA81, Tavernaero Park Airport, when I noticed a car off the side of the runway on a parallel road. This narrow road is for auto traffic so residents can access their homes along the runway. I was concerned with the proximity of the car to my intended landing area and so decided I would rather go around. Proper procedure for a go around would be to apply full power, obtain a positive rate of climb, flaps up and reenter the pattern for landing. I made a decision with dusk approaching to make an abbreviated pattern and to circle back around to the runway. I applied full power and began to turn but as I did so the engine backfired. The aircraft was not climbing normally and as I made my turn I was unable to gain sufficient altitude to maintain a visual of the runway.

I circled back around to the runway heading and saw what I believed to be the houses along the side of the threshold of runway 8. I was still unable to climb but anticipated that as I approached closer the runway would appear after I had cleared what I thought was a small block of houses. When this did not happen and without being able to climb I committed to landing on the roadway which I later determined was two blocks south and running parallel to the runway. On landing, the aircraft collided with a portable basketball hoop and was flipped.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

In reviewing the flight, go around, and approaches to land, it would be good practice in the future:

To be more conscientious of potential distractions and to use a checklist to accomplish tasks. Also, to allow sufficient time for travel so as not to feel rushed to land.
