Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> damage to the nose gear, propeller, and engine					
NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)					
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. I had planned a trip from Peru, Illinois (VYS) to Galesburg (GBG) on the morning of October 4, 2016. Pre-flight briefing and info was done and included the local ATIS, plus a briefing from FSS. The flight was uneventual; weather was great; no precipitation, etc. Upon arriving at the GBG Airport, I determined that Runway 10 was preferred. As such, I entered a left downwind for 10; went to 10° flaps; made a left base (with 20° flaps) and entered a mile final; 30° flaps were initiated once I determined the runway was secured. The final approach was uneventful at that time. On landing, I bounced the plane a small amount. I did not feel as though I had a problem yet. It felt like a wind gust caused the plane to float more than intended, as the second bounce was substantial. The airplane nose raised considerably and then dropped hard to the pavement, which caused the nose wheel to break off, sending the aircraft nose down until it stopped. I shut off the ignition and fuel lever and I was able to contact the employees at Jet Air, who immediately assisted. Small pieces of metal and the nose wheel that were scattered on the runway were collected. A front end loader was then brought out to get the plane off the runway and into a hangar at Jet Air. In summary, everything was fine on all phases of the flight except for the hard landing. Winds were out of the SE at 10 knots and gusting, which may have contributed to the accident. The FAA office in Springfield was called.
