All else intact

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I left from a fishing trip to fish again at Boco at LAN Reservoir. Upon landing at a site I have landed at several times my tires stuck in the mud. I determined that I would be able to use power and elevator to unstick the tires. Upon trying this the A.C. loosened. It did not loosen enough so when I added power it flipped on its nose. It then slowly rolled on its back. It was gentle & the glass did not even break. We rolled the A.C. on its wheels with help & removed the wings to load on a flat bed.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I have gone through this in my mind over and over. The warm up in the weather created a thick mud. I will not be landing off airport without a thorough inspection of the terrain, no matter how many times I have landed there. This has been a humbling reality check.
