Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

1. Substantial damage to wings, landing gear, fuselage. propeller completely disintegrated.
2. Damage to airport's perimeter fence near approach end of runway 30.
3. Fuel spill.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed KRVH around 13:30, landed at 1Q4, took a short break on the ground, then took off from runway 30. I stayed in a left pattern and practiced simulated forced landing / short approach maneuver without actually touching the runway. I completed two such maneuvers. On the third approach, while on a left slip + left turn, and trying to complete the turn into final, I realized that I was too low and not aligned enough with the runway to complete the maneuver successfully, so I decided to abort the maneuver. I applied full throttle, while at the same time trying to straighten the airplane, but the result was unexpected. The aircraft responded suddenly by changing attitude, lost altitude, hit the ground, and slammed into the perimeter fence.

From the time I started to abort the maneuver until I hit the fence, I can't remember the exact behavior of the airplane, except that everything was unexpected, swift, and violent. My guess is that the contributing factors were too slow air speed and unexpected high torque from the engine while trying to get out of an uncoordinated left turn.

After hitting the fence I exited the airplane.

I noticed that fuel was flowing out in front of the left wing. I called 911 and reported about the crash and the fuel leak.

The following arrived after that:

Tracy fire department.

Michael Nocon - Deputy sheriff (San Joaquin county).

Garrett Backus - from San Joaquin county environmental Health Department.

I also called the NTSB and reported the crash.

I stayed in the airport probably until around 17:00 (can't remember the exact time), then left the area with a friend that came to pick me up.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Most important: The maneuver should have been aborted earlier.

This would have given enough margin to overcome any errors in application of the controls.

In addition, a higher airspeed should have been maintained.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No
