Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Prop strike, crumpled left wing, left float destroyed

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed the Manitowish river 10/23 @ 2:00 PM heading for Arcadia to bring my plane in for the annual inspection.

The weather was clear with a wind out of the northeast about 10 knots. I flew direct to Arcadia circled the airport to see the windsock, I observed a perfect cross wind and texted my mechanic to ask how hard the wind was blowing and he replied 5 knots. I went down wind to base to final, as I touched down I applied back pressure and added power as I have done in all my other landings.

The plane lifted and quickly came down but the crosswind had blown me to the left, I was on the ground slowing down when I felt the left float buckle, the plane went down on the left side and the left wing struck and the nose went down and flipped over.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

If there would have been dew on the runway the plane would have slid better. The grass had just been cut and didn't offer as much cushion and last of all the crosswind caused the plane to drift to the left resulting in the left float to collapse. I should have flown back home and returned in the morning when there was dew & no cross wind.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
