Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Bent right wing tip

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Aircraft underwent changeover from floats to wheels on day before flight (10/19/2016).
Purpose of flight was relocation of aircraft from PALH to PAMR, a distance of ~4miles.
I checked ATIS at PALH and PAMR prior to departure.
I requested takeoff from RWY 32 at PALH direct to PAMR.
Takeoff and flight were uneventful.
Entered PAMR traffic pattern left downwind for RWY 25.
I performed a smooth wheel landing on centerline, and after the tail wheel came down, the aircraft started drifting to the right.
I attempted to correct the drift with left rudder, which resulted in a ground loop to the left.
Weather and runway conditions were fine. Aircraft was intact afterward.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Since I hadn't flown the aircraft on wheels in 6 months, a first flight with an instructor would have provided a refresher on wheel landings and probably would have prevented the ground loop.
