Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage restricted to aircraft. Both engines running and subjected to rapid forced stop. Both propellers bent back. Right wing outer panel wrinkled. Right fiberglass wing tip broken open. Right inner wing panel wrinkled just inside of outer to inner wing panel joint. Both flaps wrinkled/damaged. Right main lower landing gear section departed from main landing gear strut. Right lower engine cowling wrinkled/dented in.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Approach/landing to runway 08 at KDMN were stable and uneventful. Slowing through about 60mph let tail down and continued to decelerate. A few seconds later aircraft began to veer sharply left. By now the aircraft was close to northern runway edge and I had to allow the aircraft to depart the paved surface in a successful attempt to dodge a runway light. Aircraft continued into the unpaved area between runway 08 and taxiway alpha. This area is made up of very soft dirt/sand and the tires sunk into the surface where the right main lower landing gear section was pulled off the aircraft. This resulted in the aircraft pivoting on the remaining landing gear strut and coming to rest on a heading of about 150 degrees.
