Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.		
On October 20, 2016, my wife and I flew to Duluth, Minnesota to pick up my new Cirrus aircraft. I went through a training course at Cirrus that afternoon. The training continued on the 21st and the 22nd. We left Duluth around 11:45 a.m. the morning of the 23rd and were flying direct to Baxter County Airport - KBPK. En route, we decided to make a fuel stop and take a break at Kirksville Airport in Kirksville, Missouri - KIRK. The ASOS indicated the winds at KIRK were 270° at 10 -14 g. I landed on Runway 36. The landing was made without incident and we refueled and took a break. When we were leaving Kirksville, I did a run up and noticed there was a whistling noise. My wife's door was not properly latched. I engaged the positive door latch downward to engage it fully and the whistling stopped. We took off and once we got airborne I again started to hear a slight whistling sound and noticed the door back behind her head was not completely closed and made the decision to return to Kirksville to secure the door. I approached the landing in the same manner I had the first time with left ailerons engaged and right rudder and proceeded down the center stripe of the runway. As I attempted to make my flare, I believe the wind decreased significantly resulting in my having too much right rudder engaged causing the plane to land at a 30° angle relative to the center stripe. It left the runway and went into a slide resulting in the front nose gear collapsing and the plane slid for another 50 to 70 feet. No one was injured.		

RECOMMENDATION (How could this accident/incident have been prevented?)													
Operator/Owner Safety Recommendation Choose a different airport which didn't have a direct cross wind.
