Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Canopy was crushed and shattered. Tail, wings, dash, cowling, nose wheel, and firewall were damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Copied from FAA statement the night of the accident:

"On approach to 34L, made a late decision to execute a "go-around." A crosswind threw me off course and I panicked and let out the rudder which made the plane veer even further off course due to full power and low speed. I pulled power briefly and decided to reapply power in hopes climbing but the plane stalled and hit ground. The nose wheel stuck in a section of mud and flipped. I pulled myself out and shut off fuel, magnetos, and electrical circuits."

I've had doubts about this portion of my statement: "...and I panicked and let out the rudder..." The night of the accident I couldn't explain why I veered so far off course so I assumed that I let out the rudder however after seeing the trailing edge of the left wing (where it begins to slope upwards) and the adjacent corner of the aileron it is more likely that the wing touched after the gust and I was correcting into the wind. Since the wing and aileron were touching the ground when full power was applied it became a pivot point throwing me off course and counteracting the rudder.
