NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Saturday, November 5, 2016 on the KDWA, Yolo County Airport, I was acting as the flight instructor for a bi-annual flight review. We had landed and taxied back for take-off. We lined up on the runway and the student brought both engines up to 25 inches manifold Pressure (MP) and checked the gauges, released the brakes and added full power. At that time I reduced the mixture on the left engine. The student froze on the control and we started veering to the left. I tried to pull the other mixture to idle, but my hand came off the mixture and we continued to left. I finally got my hand back on the right mixture and pulled it to idle cut-off. By this time we were seventy feet off the left side of the runway.
