NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We were enroute from KPUB to KFNL for dinner. The passengers were doing some sight seeing while i was flying the aircraft. We were over Centennial when i proceeded to make a 360 degree turn to get clearance into the Denver Class Bravo airspace. After receiving our clearance, we proceeded northbound, remaining west of I-25 at 8,500' MSL. We were approximately over the town of Englewood, CO when we heard a loud bang. There was blood and bird remains on the windscreen and the left wing strut. the plane had a harsh rolling tendency to the right and reduced engine power and vibration. I notified Denver TRACON of the bird strike and they told me to contact centennial tower. I contacted Centennial Tower and alerted them of the bird strike and declared an emergency. They acknowledged the emergency and cleared me to land on the 17L runway. We approached at approximately 115 KIAS. On about a 3 mile final, i started to pull power to slow to an approach speed. The plane suddenly rolled to the right, almost out of control. I added power again and corrected for the sudden right roll. At approximately 50' off the runway, i pulled the power to land. I was indicating 95 KIAS and wanted to slow a little for the landing. Pulling the power resulted in us falling the last 50' to the ground. We landed fairly hard and put a bald spot on the tire. We exited the runway and taxied to Denver Jet Center at Centennial. We secured the aircraft and got out to inspect the damage. We found that we had hit about 4-5 birds. The next morning, we found out that the remains of the bird that were ingested into the engine cowling hit a fuel injection line, most likely blocking the fuel in the line, resulting in the loss of a cylinder and the bad engine power after the strike.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I dont think that this could have been prevented. The dark night conditions resulted in reduced visibility of birds in the air. It was impossible to see the birds flying in the flight path and impossible to avoid.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No
