Departed Burlington, VT (KBTB) at 2:30pm local time. Flew north of the KBTB airport, to the designated KBTB airport training area for basic air practice. From there, we requested to practice a VFR single engine approach, RNAV 17 into Plattsburgh, NY and we were cleared for the approach and vectored on near OTGOE (IAF). While on RNAV approach aircraft was stable and centered on GS path with proper airspeed and landing gear extended. Radio transmissions were announced several times on Unicom Freq with no response. Nearing runway, aircraft was spotted taxiing toward hold short line A for runway 17. CFII Pilot not flying aircraft reconfirmed proper airspeed and gear extension, before watching aircraft near hold short line on A taxiway. CFII pilot announced over unicom Freq short final approach to runway 17 while watching for any more aircraft movement next to hold short line. At the same time on short final approach some lift was lost in sink over gully with combination of early extension of flaps causing aircraft to sink below proper approach path. When pilot at controls added some power to attempt to hold altitude, the aircraft veered to the left (VMC) and lost more altitude resulting in a stalled condition. CFII Pilot who had been watching traffic took over flight controls, and reduced thrust from right engine to regain control. Aircraft aggressive left bank was eliminated at extremely low altitude. After level and straight ahead flight was regained aircraft was too slow to reverse the high sink rate and aircraft landed with excessive vertical speed collapsing nose gear and right main gear. Door was opened and both pilots exited the aircraft with no injuries or damage to surrounding airport area.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Maintain altitude, airspeed and minimize drag on a single engine approach.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
