Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Axel of Left main sheered off. Wing tip and outboard edge of left aileron wrinkled.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

on 9 Nov 2016 I flew my plane to my ADP IA for an oil change and new brake pads. He was finished on the following day and flew the airplane to KRAS to pick me up for a return flight to his home base. I paid him and departed IRS to return to KRAS. As I remember the AWOS was reporting winds of 020 @ 16. The visibility was 10 miles. It was pretty much a direct crosswind for 12/30 and I elected to use 30 which gave me a normal pattern entry. Though it was gusty I had no trouble landing with the cross wind. As I was rolling out my attention evidently wandered as there was a wind gust and the airplane weathervaned and ground looped. I didn't act quickly enough because of inattention I suppose.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

By flying the airplane until it was in the hangar.
Perhaps one notch less flaps and a wheel landing?
In reality, I was complacent and should have been more attentive.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
