Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to one blade of the propeller. Damage to the front strut landing gear and the connection to the frame.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Friday, November 4, I arrived at Bowman Field at 2pm and reviewed both weather and flight plans for my cross-country solo flight. Around 3pm, I departed Bowman in aircraft N456SP and used Flight Following Service on my direct flight to Danville, Ky (KDVK). I arrived in the Danville area a little before 4pm and checked weather after being handed off from Flight Following. I found winds at 010 at 7 knots. I went through my normal entry into the pattern and started my normal landing procedures. Upon final approach as I was over runway 30, I experienced what felt like a down draft or sheer and dropped to the runway before my anticipated location. I met the runway in the center and landed in a level 3-point attitude causing a bounce. The second contact, the front wheel landed first and then the back wheels. The aircraft then settled to the runway with the aircraft a couple feet left of the center line and fully parallel with the runway. I taxied the aircraft to the Danville ramp and parked. I contacted my CFI and told him I had bounced my landing and was ready to depart Danville and return to Bowman. Upon taxiing the aircraft to the runway, I experienced some control problems and returned to the ramp where I contacted my CFI. When I deplaned, I noticed damage to one tip of the propeller. My CFI working with the owner had mechanic picked me up at Danville. I returned to Bowman via ground transportation with the mechanic.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I'm not the owner. Down draft / sheer brought me down earlier than anticipated.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No
