Date of Incident: Sunday Nov. 20th, 2016

Pilot: Cleve Randy Massey Plane: Cessna SkyHawk N4331R

Location: 2A0 Mark Anton

Decided after several days of waiting for weather to clear to fly solo cross country

Contacted instructor, John Burt, and requested to proceed with Solo Cross country from KDKX to 2A0 (had landed there 2 times prior).

Met John at airport KDKX (Knoxville Downtown) at 10:15.

John examined my Pre filled Navigation Log for both legs of the trip. John asked that I run through several calculations on the Navigation Log and found those to be correct he then signed both navigation logs to and from 2A0 (Mark Anton).

Next I filled out a Flight Plan Form in preparation of calling Flight Services. He examined flight plan form. Check the times and signed the form. He then instructed me to call the flight services [REDACTED] and review form with them and get flight briefing. Visibility was

confirmed for VFR conditions and weather was well within my limitations. I told flight services I would activate the flight plan in the air.

John then reviewed all my flight materials – airport frequencies, order of events, and section marked for pilotage with times of arrival. John asked several questions related to the flight (to see if I had done my homework) and instructed to Preflight SkyHawk 4331R as if my life depended on it.

Preflight of 4331R took approximately 35 minutes.

I then moved 4331R from the tank farm to the run-up area of KDKX runway 26. Completed Run-up and proceeded to takeoff departing the pattern at KDKX from the downwind side for a heading of 240.

Upon final call to KDKX 126.6 I flicked radio 2 to 128.35 KTYS ATIS to collect current information of Tyson (Knoxville).

After noting ATIS info and Name I returned radio 2 to guard (121.5)

And flipped radio 1 to 123.9 Knoxville Approach.

Upon acknowledgment I stated departure, altitude, stated destination, and requested flight following. KTYS issued me Squawk Code 3036 (I believe that was code but would not be able to confirm) and told me to hold at 2500 ft. for 10 minutes and then I would be able to proceed to 3500 (with confirmation). I confirmed code and altitude. Flight proceeded uneventful until Mark Anton.

THE INCIDENT

While approaching the towers at Watts Bar I turned Radio # 2, which I had previously set Channel B to Mark Anton AWOS 135.075, and listened to the automated report.

Upon arriving at Mark Anton I made a circle around the Wind Sock at 3000 ft. to avoid pattern space. Wind was blowing Crosswind firmly southeast to northwest.

I chose to cheat to the Southeast side of runway 21 in case the crosswind pushed the flare. As I approached the numbers the wind had picked up so I added a small amount of crab to the final approach. As I was settling into ground effect I saw something, I first thought was a big dog, approach from the southeast back corner about 30 degrees off Pilot door. It was trying to pass me – running real fast. I have since settled on a deer but could not ID it in a lineup. But it was fast!

I chose to apply a missed approach and was applying power and turning slightly toward the crosswind when the left wing dipped violently to the ground (Grass) and when wing touched ground I used rudder and aileron to correct right. When the wing touched, the front went down hard on front gear. I was able to get it back on base wheels, but the damage was done to the front gear.

I had head phones on so I don't know if – whatever it was that hit me - except the pitch changed so violently it was if something had hit the left side landing gear.

Respectfully,

C. Randy Massey

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Clearly marked in Airport Directory "DEER". Should have flown runway at 100ft to inspect for movement. Had seen DEER in directory and not paid it any attention. Will from now on!!
